10 DAYS TRAINING

A professional training program from the 8th to the 18th June designed to provide practical skills in public sanitation, road cleaning, recycling, waste management, and environmental protection.

EXPERIENCED PROFESSIONALS

The program is designed and conducted by professionals experienced in public sanitation and environmental services.

GREATEST SERVICE

PROFESSIONAL

We provide modern practical training in public sanitation, road cleaning, and recycling.

LANGUAGE

Training sessions will be conducted in English with French translation and basic Swahili support for all participants.

ABOUT THE TRAINING

This professional training program is designed to provide participants with practical knowledge and modern skills in recycling, waste management, road and public space cleaning, public sanitation, and environmental protection. Through theory and hands-on field experience, participants will learn modern sanitation practices that help create cleaner, healthier, and more sustainable communities.
